SUMMARY

Staff Software Engineer with 12 years of experience building enterprise software, and 3+ years leading AI-first development practices. At Conga I progressed from Full Stack Senior Developer to Tech Lead to Staff Software Engineer on the Platform CLM team, a .NET and React contract lifecycle management product. I build enterprise platforms, developer AI agents, Model Context Protocol (MCP) integrations, spec-driven delivery workflows, and automated verification harnesses. I also served as interim Scrum Master and as a technology coach running upskilling sessions for the team.

CORE SKILLS

AI & Agentic Systems: AI agents (Bifrost), Model Context Protocol (MCP), agentic workflows, custom agent skills, OpenSpec, Superpowers, spec-driven development, knowledge-base engineering, automated verification harnesses, AI-first development

Backend: C#, .NET, .NET Core, ASP.NET Core, ASP.NET MVC, CQRS, REST and Web APIs, WCF, MS SQL Server, Oracle, Redis, multithreading, LINQ

Frontend: React, JavaScript, Angular 8, AngularJS, Node.js, HTML5, CSS3, Bootstrap, jQuery, jQuery UI, WPF

Architecture: Microservices, distributed systems, modular service decomposition, containerization, design reviews, enterprise integration patterns

DevOps & Tooling: Docker, Azure DevOps, VSTS, Jenkins, CI/CD, GitOps, Azure CI pipelines, Jira, Confluence, TFS, Quartz, Umbraco, OpenSpan, Pega

Leadership: Tech Lead, Staff-level technical direction, interim Scrum Master, offshore team management, mentoring and tech upskilling

Certification: Microsoft Certified: Azure Developer Associate (AZ-204)

PROFESSIONAL EXPERIENCE

Staff Software Engineer | **Conga** | Ahmedabad, Gujarat Jul 2023 – Present
Platform – Contract Lifecycle Management (CLM) · Promoted: Full Stack Senior Developer → Tech Lead → Staff Software Engineer

- Joined Conga as a **Full Stack Senior Developer** on the Platform CLM team, building features end-to-end across the ASP.NET Core / .NET backend (CQRS, REST APIs, MS SQL) and the React front end of the contract lifecycle management product.
- Promoted to **Tech Lead**, taking ownership of technical design, code review, and delivery for the CLM platform; drove modular service decomposition and established architecture and quality standards across the team. Promoted on to **Staff Software Engineer**, setting technical direction for the platform and aligning multiple teams on design, quality, and delivery outcomes.
- Served as **interim Scrum Master** for the team — running sprint planning, daily stand-ups, retrospectives, and stakeholder ceremonies — while also acting as a technology coach delivering upskilling sessions for team members.
- Led the team's **AI upskilling** in response to the GenAI wave and drove adoption of **AI-first development workflows** across the engineering organization.
- Architected and deployed **Bifrost**, an internal AI agent with an automated knowledge base indexed across internal repositories covering system structure, runtime procedures, and test execution — accelerating developer onboarding and issue resolution.
- Built internal **developer agents and skills** for the development workflow and delivered **MCP integrations** with Jira, Confluence, and local test environments.
- Pioneered **spec-driven development** with OpenSpec and Superpowers skills, improving delivery speed while keeping implementation aligned to approved design specifications.
- Engineered an evolving **automated verification harness** for localized and environment-specific QA, automating proof of verification and reducing regression cycles; mentored engineers on C#, .NET, React, and AI-assisted development practices.

Technologies: C#, .NET Core, ASP.NET Core, React, CQRS, REST APIs, MS SQL, Docker, Jenkins, Microservices, Jira, Confluence, MCP, AI agents, OpenSpec

Professional II – Engineer | **Capgemini** | Gandhinagar, Gujarat Jul 2021 – Jul 2023
Cell Processing Application – medical equipment software

- Engineered Web APIs, UI components, and worker services to extend and implement functionality for a high-precision cell processing medical equipment application.
- Implemented backend architecture using C#, .NET Core, CQRS, MS SQL, and microservices, with a clear separation between command and query responsibilities.
- Managed containerized deployments and automated builds with Docker and Azure CI pipelines.

Technologies: C#, .NET Core, CQRS, MS SQL, Docker, Azure CI pipelines, Microservices

- Developed package tracking and billing functionality for the UPS–Siemens enterprise portal, integrating Web API calls and TFS-based source control.
- Built dynamic web interface components for the UPS operations services (OPT) portal.

Technologies: ASP.NET, C#, MS SQL Server, Web APIs, TFS, Angular 8, HTML5, Bootstrap, CSS

Technology Analyst / Senior Systems Engineer | Infosys Ltd. | Mysore & Pune

Oct 2014 – Mar 2019

Client: Telstra (Australian telecommunications) · Managed offshore engineering as Technology Analyst

- **GFS – Global Finance System:** built the ASP.NET web management console to manage, log, and trigger OpenSpan (Pega) automation bots for billing and inventory ordering workflows; implemented CI/CD with VSTS.
- **Q2A to LOLO:** created an integration solution that combined web APIs from two independent provisioning systems to eliminate manual user intervention and repetitive tasks, using secure web service calls (SiteMinder, RAA).
- **Forward Migration:** worked in a team of three to replace a legacy tool with SQL stored procedures, VBScript, and batch automation for migrating customers onto new technology networks.
- **CIMD – Customer Interface Management Database:** supported and enhanced an application that migrated Telstra customers to NBN optical fibre networks, delivering two major releases plus minor changes, using Redis for session management, Umbraco CMS, EPPlus, and Quartz scheduling.
- Allocated to the Microsoft .NET training stream: C# programming, ASP.NET web application development, web services and WCF; completed training with an overall score of 86%, including certifications in MVC, jQuery, AngularJS, and mobile web development (jQuery UI, HTML5, CSS3).

Technologies: C#, ASP.NET, ASP.NET MVC, WCF, jQuery, AngularJS, Redis, Umbraco, EPPlus, Quartz, OpenSpan, VSTS, MS SQL Server, Oracle, VBScript

EDUCATION**Bachelor of Engineering, Information Technology | Gandhinagar Institute of Technology**

2010 – 2014

Final semester CPI: 7.15

International Education Program | Laurentian University, Sudbury, Ontario, Canada

2013

Selected as one of 96 students by Gujarat Technological University for an international academic exchange.

Higher Secondary (HSCE) & Secondary (SSCE) | Sheth C.N. Vidyalyay

2010 / 2008

HSCE 65.53% · SSCE 83.71%

PROJECTS

- **Automated Timetable Generation** (Final year project) – Java with graph coloring algorithms; winner of the Dewang Mehta IT Award (2014) and Best Project Award at the college project fair.
- **Library Management System** (CSR project) – C#, WPF, MS SQL Server.

ACHIEVEMENTS

- **Entrepreneurial Spirit – Hotshot (Jul 2026):** Named AI trailblazer for the CLM team; among the first to build an MCP server on Conga's new platform AI framework and created a Claude-based demo of the full CLM lifecycle for the sales team.
- **Entrepreneurial Spirit – Hotshot (Sep 2025):** Grand Prize at the Conga AI Hackathon, receiving the highest peer votes for an AI prototype now under evaluation for product use.
- **Entrepreneurial Spirit – Legend (Aug 2024):** Built a tenant-to-tenant contract data migration tool over a weekend to unblock the Microsoft Copilot POC with realistic CLM data.
- **Achieve Together – Legend (Jan, Feb & Aug 2026):** Recognized for building the Supplier Management foundation (first CLM Greenfield initiative), supporting documentation for the Feb '26 release, and delivering the Conversations feature.
- Dewang Mehta IT Award Winner (2014) – Automated Timetable Generation system.
- Director's Recognition Award from client Telstra (2018).
- Multiple Insta Awards – CIMD and Forward Migration (2016); CIMD, Forward Migration, and GFS RMO 3.5 (2017); GFS project (2017).

INTERESTS

Advances in artificial intelligence, developer tooling and agentic systems, science fiction, and fantasy film and television.
